

IDEA 32 Critical Hip hop Pedagogy: Making schools work for urban teachers and their students

IDEA 32 promotes Critical Hip Hop Pedagogy and the 5 elements of its basic core:

- The centrality of race and racism and how they intersect with other forms of oppression
- Challenging traditional paradigms, texts, and theories used to explain the experiences of students of color
- The centrality of experiential knowledge of students of color
- The commitment to social justice
- A trans-disciplinary approach: learning that is authentic and relevant to the real world
